

POSITION: Environmental Consultant (hazardous materials)

Focus: Environmental site assessments/investigations and environmental compliance

Experience: A minimum of 2 to 5 years of professional experience is required and a Bachelor's degree in geology, environmental science, or civil/environmental engineering. A Master's degree is preferred, as well as a professional registration (PG or PE).

Job Description: Baseline specializes in Phase I/II Environmental Site Assessment reports to evaluate soil, soil vapor, and groundwater contamination; remediation planning and implementation; environmental compliance monitoring during construction (e.g., air monitoring and confirmation sampling); and long-term groundwater monitoring. Baseline also specializes in the preparation of technical studies related to hazardous materials to support environmental review of projects under CEQA. Typical projects include residential and commercial development, highways expansion, infrastructure improvements, and master plans. Over time, there may be opportunities to expand this position and learn technical analyses related to other disciplines, such as geology, hydrology, air quality, and noise and vibration.

Excellent organizational, written, verbal, and interpersonal communication skills and attention to detail are required. Knowledge of software programs such as CAD and GIS is preferred. This position requires a self-directed and independent worker who also enjoys working in a team environment and is eager to take on new challenges!

Baseline offers competitive wages and compensation package, including 401(k), medical, dental, vision, and life insurance, and 10 to 25 days of vacation per year for full-time employees.

Interested applicants should email a resume with a brief cover letter to info@baseline-env.com. We request that applicants refrain from calling or visiting our office.
