

POSITION: Acoustical Consultant

Focus: Noise and vibration studies for proposed development projects in the Bay Area.

Experience: A minimum of 2 to 5 years of professional experience is required and a Bachelor's degree in acoustical engineering/science or similar. A Master's degree is preferred.

Job Description: Baseline specializes in the preparation of technical studies related to noise and vibration to support environmental review of projects under CEQA/NEPA. Typical projects include residential and commercial development, highways expansion, infrastructure improvements, and master plans. Over time, there may be opportunities to learn technical analyses related to other disciplines, such as air quality assessments.

Excellent organizational, written, verbal, and interpersonal communication skills and attention to detail are required. Knowledge of software programs such as SoundPlan, TNM, and MatLab is preferred. Interest in field work to assist other Baseline staff with noise level measurements or soil and groundwater investigations is also preferred. This position requires a self-directed and independent worker who also enjoys working in a team environment and is eager to take on new challenges!

Baseline offers competitive wages and compensation package, including 401(k), medical, dental, vision, and life insurance, and 10 to 25 days of vacation per year for full-time employees.

Interested applicants should email a resume with a brief cover letter to info@baseline-env.com. We request that applicants refrain from calling or visiting our office.
